## Zespri 2km Junior Dash Training Diary

Running is easy and all you need is a pair of good shoes and a positive attitude. But remember to start out **EASY!**

Always **WARM UP** before you run. Jog on the spot for a few minutes, jump rope or run easy for a few minutes. Anything that gets your heart beating faster and warms up your muscles. Do some light stretching during your warm-up starting with the biggest muscles first, your legs.

Don't overdo your first few days. Don't run too hard so that you are so sore for the next few days.

Run on soft surfaces, such as grass or on sand as much as possible. This helps to avoid injury.

Go down to your local sports field or park and run there. Even your school oval would be a good place to start, as you could run in your lunch hour or before or after school.

<b>Saturday</b>	<b>6 May</b>			
<b>Sunday</b>	<b>7 May</b>	Run	5 minutes	Easy & on grass

Pace yourself when you start out. Don't start out at full speed because you won't be able to maintain this for a long distance.

Give your bones and muscles a rest from running every other day. Swim, ride your bike or roller blade etc.

Remember to smile when you run!

Running with your friend is fun. Together you can push each other to achieve more. Also if you plan to meet one of your friends to run, you are more likely to not put it off.

Don't forget to warm up and stretch well before you do any running session.

Encourage people who can't keep up.

<b>Saturday</b>	<b>3 June</b>			
<b>Sunday</b>	<b>4 June</b>	Run	9 minutes	Easy

When running faster make sure that you continue to breathe and focus on your technique. Head held high, a slight lean forward and pump those arms.

When resting between sets, take some deep breaths and walk around. Keep your legs moving. Sitting down will only make your legs sorer as the lactic acid (what makes your legs feel sore) will build up.

Listen for footsteps, but don't look back if you are in the lead.

## The day before the race

### Get organised

This is the time to ensure you have everything you need and to figure out all the details such as where the toilets are and what to do with your warm up gear.

In the morning of the race if you can wake at least 2 hours before the race you will feel wide awake and ready to run. Have your breakfast early and have a drink before the race. You might need to go to the toilet just before your race - so find out where the nearest toilets are.

Generally it is a good idea to do some light jogging the day before the race, particularly to wake your body up after a couple of weeks of light training, like a pre race warm up.

## Race day

You have trained for this race. You have completed probably the hardest part of the event - the training. Now comes the fun bit!

You need to be highly organised on race morning so you can relax knowing that all the details have been taken care of.

Arrive at the race start with plenty of time. Take care of the details, such as applying your race number and knowing where you have to start.

Getting nervous before a race is normal, in fact it is a good thing. This means you are ready to run and your body is psyched.

Think positively! You will only do as well as you **THINK YOU CAN.**

## During the race

Remember to keep well hydrated, particularly if it is a hot day. Do not drink too much. Once you are hydrated you will not benefit from over hydrating.

Be careful you don't get caught up in the hype of the start. It is easy to think that you are not running hard enough. You will feel good for the first part of the run because you are very fit.

Don't try and run too fast - make sure you relax and have some fun!

## Immediately after the race

Have a drink straight after your race - water is very good for you.

It is also a good idea to have a piece of fruit, like Zespri SunGold Kiwifruit, to eat at the same time.

Then have a good rest for a few hours. And don't forget to keep drinking lots!
